

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. INTRODUCTION.

A LETTER written by an individual is a valuable factor in determining his adaptability to business.

If the letter is incorrectly arranged, it indicates a want of acquaintance with accepted business forms; if the writing is bad, it shows that the accounts which he would be called upon to render would not be presentable; but if the *spelling* is bad, it at once *decides* the question of desirability against the applicant.

In England it is reported that at a recent examination of candidates for Public Service, nineteen-twentieths of the class failed in spelling, and an Educational Report of that country says: "Spelling is not what it should be. What we want is to *teach* spelling, and not merely to practise spelling."

Civil Service examination papers in this country also show a remarkable deficiency in this important study.

Correct spelling is, therefore, a requisite which evidently cannot be obtained by the old spelling methods. The situation requires a text-book by which spelling may be *taught*, and this educational demand is met by the *New-Method Speller*.

It is claimed for this text-book that its methods of presentation not only produce better results than can be obtained by any other means, but that by its use the Teacher is aided in the exercise of his own individual aptness in English instruction.

In the preparation of this work, the latest edition of Webster's International Dictionary has been taken as the standard.

SUGGESTIONS TO TEACHERS.

THE words of the *New-Method Speller* are arranged in accordance with the laws of association.

The primitive word, which is printed in **broad-faced** type, forms a key to the meaning of each derivative word which follows it, and the student is assisted further by having the primitive word divided into syllables and furnished with its proper accent. To reap the full benefit of this book, each recitation should be a combination of oral and written work. The primitive word should be pronounced and explained by the teacher, and a student required to state orally all of its given derivatives. Other students should express the various modifications of the primitive, in form and meaning, when combined with its several prefixes and suffixes. The class should then be required to write such words as the teacher may select. Original investigation by students may be cultivated by encouraging them to supply additional derivative words, which the prefix and suffix tables, with the rules of spelling, enable them to form.

Students, by this method, learn the correct pronunciation and meaning of primitive and derivative words, obtain a knowledge of the different elemental parts of words and of the ideas which they represent, and thus acquire the ability to use words intelligently both in speaking and writing.

EXPLANATION.

A CROSS (+) represents so much of the primitive word as is printed in heavy type, and a STAR (*) represents the entire word; thus, if the primitive word be **profound**, *ly would represent *profoundly* and +ity, *profoundity*.

The distance of the star (*) from the remainder of the derivative will show how the word should be written, whether solid or with an intervening space; thus, if the primitive be **life**, *like, *-preserver, * insurance, would respectively represent *lifelike*, *life-preserver*, *life insurance*.

The accent of the primitive should be retained on the same syllable of each of its following derivatives, except when the derivative is enclosed within curves (), as shown in the first line of LESSON XLVI.

An indented line refers to the primitive of the preceding line, as illustrated in the eighth line of LESSON XXXIV.

PARALLELS (||) are used to indicate that in the following derivatives the primitive is used with a different meaning, as exhibited in the fifth line of LESSON XLIII.

RULES FOR SPELLING.

The following rules will assist the student in the formation of many words.

(1) A monosyllable ending with a single consonant (except *h* and *x*), preceded by a single vowel, doubles the final consonant before a suffix beginning with a vowel; as, *blot* + *ed* = *blotted*, *plan* + *ed* = *planned*, *run* + *ing* = *running*.

Words of more than one syllable, if accented on the last syllable, are included under the above rule, except when the addition of the suffix changes the position of the accent; as, *admit'* + *ance* = *admit'* *tance*, *confer'* + *ed* = *confer'* *red*, *confer'* + *ence* = *con'* *ference*.

Exceptions: *chagrin'* + *ed* = *chagrin'* *ed*, *infer'* + *able* = *infer'* *able*.

(2) Words ending with a double consonant retain both consonants when receiving a suffix; as, *ebb* + *ing* = *ebbing*, *will* + *ful* = *willful*, *drill* + *ed* = *drilled*.

NOTE 1.—To avoid a triple consonant one *l* is dropped from derivative words formed by the addition of the suffix *ly* to primitive words ending in *ll*; as, *full* + *ly* = *fully*, *squall* + *ly* = *squally*.

NOTE 2.—*All* and *full* when used as parts of a word usually drop one *l*; as, *all* + *ways* = *always*, *faith* + *ful* = *faithful*, *full* + *ful* = *fulful*.

Exceptions: *carry* + *all* = *carryall*, *full* + *ness* = *fullness*, *full* + *grown* = *full-grown*.

(3) Words ending with a silent *e* usually omit it before a suffix beginning with a vowel; as, *move* + *ed* = *moved*, *trouble* + *ing* = *troubling*.

Exceptions: *dye* + *ing* = *dyeing* (coloring), to distinguish this word from *die* + *ing* = *dying* (expiring); and *singe* + *ing* = *singeing* (scorching). to distinguish it from *sing* + *ing* = *singing* (melody).

(4) Words usually retain the silent *e* before a suffix beginning with a consonant; as, *trouble* + *some* = *troublesome*, *store* + *house* = *storehouse*, *white* + *ness* = *whiteness*.

Exceptions: *abridge* + *ment* = *abridgment*, *acknowledge* + *ment* = *acknowledgment*, *lodge* + *ment* = *lodgment*, *judge* + *ment* = *judgment*.

(5) Words ending with *e* preceded by *c* or *g* retain the *e* before a suffix beginning with *a* or *o*, to preserve the soft sound of *c* or *g*; as, *courage + ous = courageous*, *notice + able = noticeable*, etc.

(6) Words ending with *ie* change the *ie* to *y* before the suffix *ing*; as, *die + ing = dying*, *tie + ing = tying*.

(7) Words of more than one syllable ending with *y* preceded by a consonant usually change the *y* into *i* before a suffix; as, *busy + ly = busily*, *glory + ous = glorious*, *study + es = studies*.

Exceptions: Final *y* is sometimes changed to *e* instead of *i*; as, *bounty + ous = bounteous*, *plenty + ous = plenteous*, etc.

Derivatives formed by adding the suffix *ship* retain the *y*: *lady + ship = ladyship*, *surety + ship = suretyship*. *Y* is also retained in the possessive case singular of nouns; as, *Mary's*, *lady's*.

(8) Words ending in *y* preceded by a vowel usually retain the *y* unchanged before a suffix; as, *convey + ing = conveying*, *pay + able = payable*, *survey + or = surveyor*.

Exceptions: *day + ly = daily*, *pay + ed = paid*, etc.

(9) Words ending in *c* hard add *k* before suffixes beginning with *e*, *i*, or *y*, to preserve the hard sound of *c*; as, *traffic + ing = trafficking*, *physic + ed = physicked*, *zinc + y = zincky*.
